

William J. Day  
Marathon Ashland Petroleum LLC  
2500 Broadway Avenue  
Evansville, IN 47712-4917

Re: 163-13715-00025  
Administrative Amendment to  
FESOP 163-7179-00025

Dear Mr. Day:

Marathon Ashland Petroleum LLC was issued a federally enforceable state operation permit (FESOP) on August 8, 1997 for a gasoline storage terminal located at 2500 Broadway Avenue, Evansville, IN 47712-4917. A letter requesting a revision was received on January 9, 2001. The request was made to change the responsible official. Pursuant to the provisions of 326 IAC 2-8-10 the permit is hereby administratively amended as follows:

A.1 General Information

The Permittee owns and operates a petroleum products terminal.

Responsible Official:	<del>Fred L. Adams</del> <b>Noel R. Garza</b>
Source Address:	2500 Broadway, Evansville, IN 47712
Mailing Address:	539 South Main Street, Findlay, OH 45840
SIC Code:	5171
County Location:	Vanderburgh
County Status:	Marginal for ozone, attainment for all other criteria pollutants
Source Status:	Synthetic Minor Source, FESOP Program

All other conditions of the permit shall remain unchanged and in effect. Please attach a copy of this amendment and the following revised permit page to the front of the original permit.

This decision is subject to the Indiana Administrative Orders and Procedures Act - IC 4-21.5-3-5. If you have any questions on this matter, please contact Allen R. Davidson at (800) 451-6027, press 0 and ask for extension 3-5693, or dial (317) 233-5693.

Sincerely,

Paul Dubenetzky, Chief  
Permits Branch  
Office of Air Quality

## SECTION A SOURCE SUMMARY

### A.1 General Information

The Permittee owns and operates a petroleum products terminal.

Responsible Official: Noel R. Garza  
Source Address: 2500 Broadway, Evansville, IN 47712  
Mailing Address: 539 South Main Street, Findlay, OH 45840  
SIC Code: 5171  
County Location: Vanderburgh  
County Status: Marginal for ozone, attainment for all other  
criteria pollutants  
Source Status: Synthetic Minor Source, FESOP Program

### A.2 Emission Units and Pollution Control Summary

This secondary source consists of the following emission units and pollution control devices:

(1) Petroleum product loading rack

VOC emissions from the loading rack are controlled by a stationary vapor combustion unit (VCU). During periods when the stationary VCU is inoperable due to malfunction or preventive maintenance, VOC emissions from the loading rack are controlled by a portable VCU.

(2) Four (4) floating roof and six (6) fixed roof petroleum storage tanks.

(3) Barge Loading / Unloading.

### A.3 Insignificant Activities

This stationary source also includes the following insignificant activities, as defined in 326 IAC 2-7-1(20):

(1) Natural gas-fired combustion sources with heat input equal to or less than ten million (10,000,000) British thermal units per hour.

(2) Groundwater oil recovery wells.

(3) Activities associated with the treatment of wastewater streams with an oil and gas content less than or equal to 1% by volume.

(4) Heat exchanger cleaning and repair.

(5) Process vessel degassing and cleaning to prepare for internal repairs.

(6) Stockpiled soils from soil remediation activities that are covered and waiting transport for disposal.

(7) Equipment used to collect any material that might be released during a malfunction, process upset, or spill cleanup, including catch tanks, temporary liquid separators, tanks, and fluid handling equipment.
